

STATISTICS BY DISTRICTS, 1987

One of the oldest types of geographic area for which statistics are available in Hawaii is the district. These areas were first defined many centuries ago by the ancient Hawaiians, who called them moku and sometimes apana, kalana, moku'aina, or 'okana. Their use for statistical purposes dates back to Umi's legendary census in the early 1500s, and more recently in the censuses conducted by the American missionaries in 1831-1832 and 1835-1836. First officially described in the laws of the kingdom in 1859, they have undergone relatively little modification in more than a century.^{1/} Today, there are 28 districts legally defined "for election, taxation, education, city, county, and all other purposes" in the Hawaii Revised Statutes.^{2/} These districts are shown on the map on page 3.

Although the term "district" in this context specifically refers to 28 distinct geographic areas delineated in State law, the general nature of the term invites confusion with a wide variety of other types of districts recognized in State law or ordinary speech. Examples include congressional, senatorial, representative, council, land use, and fire districts, and the word is sometimes a synonym for neighborhood or community. To avoid possible confusion, census reports early in the century began referring to the areas in question as "judicial districts," a function included in the former statutory description but deleted in recent years.

Not all statistical series available by districts are initially collected and tabulated for such areas, even though they can be readily translated into district data. The Honolulu Department of Finance, for example, tabulates information on assessed values by tax zones, which typically but not invariably are coterminous with the district system; the exceptions are Honolulu (consisting of TMK 1-1, 1-2, and 1-3) and Lahaina and Lanai (combined as TMK 2-4). In the case of recent census statistics, it may be necessary to approximate district areas by combining data for two or more census tracts or census county divisions. Similarly, election statistics can readily be put on a district basis by combining data for the precincts making up each district.

As of today, the following current statistics are available for districts in Hawaii:

Area. Planimeter measurements of the land and water area of districts have been published by the Bureau of the Census (see Report CTC-46, table 1). A problem with these estimates is the failure of district data for the Neighbor Islands to add exactly to revised totals later published only at the island or county level.

Population and housing units. As noted earlier, population counts were first compiled by districts at an early date. District totals on the housing stock go back to 1940. Although the decennial census reports discontinued the

publication of district totals after 1950, district data can be approximated by combining figures for the constituent census tracts and census county divisions. Census figures on population for both 1970 and 1980 and estimates for 1986 appear in the present report, table 1. Housing unit data for 1970, 1980, and 1984 were presented in Report CTC-61, table 2.

Births and deaths. Birth and death statistics, by district and census tract of residence, have been compiled by the Hawaii State Department of Health since 1940. These data have been published in several reports issued during the past two decades, most recently in the Department's R & S Report No. 33, "Vital Statistics, Hawaii, 1975-1979, by County, Judicial District and Census Tract" (1981). Data for 1983, 1984, 1985, and 1986 are given in the present report, tables 2, 3, and 4.

School enrollment. The Hawaii State Department of Education has tabulated statistics by district on school membership in grades 1 through 6, public and private schools combined, for Fall dates in 1939, 1949, 1959, 1960, and annually beginning in 1964. These data refer to the district in which the school is located rather than to the district in which the pupils reside. The compilations have been made for use in population estimation and until recently have remained unpublished; the September totals for 1983, 1984, 1985, and 1986 appear in table 5.

Registered voters and votes cast. Data by districts on registered voters and votes cast have been compiled for the general elections of 1950, 1960, 1970, 1972, 1980, 1982, 1984, and 1986. The 1950-1970 statistics appeared in Report CTC-20; 1980, in CTC-61. Tables 6 and 7 of the present report contain the 1980-1986 district data.

Hotel units. The number of hotel units (including condominium units in rental pools for transient use) in each district has been tabulated from time to time by the Department of Business and Economic Development. Statistics for 1940-1981 appeared in Report CTC-47, and data for 1982-1987 are cited in table 8 of the present compilation.

Housing units served by public utilities. District data on county water services, residential customers of electric utilities, telephone residence main stations, and (to a limited extent) residential gas customers have been compiled by DPED from utility companies for 1949-1950, 1959-1960, and annually since the middle or late 1960s. Some of these series have been reproduced in publications of the Honolulu Redevelopment Agency and Honolulu Department of Housing and Community Development during the 1970s. The most recent statistics for telephone homes and piped gas customers appeared in Report CTC-61, tables 11 and 12. District detail on water services and electric meters for recent years is given in tables 9 and 10.

Assessed values. District break-downs on the assessed valuation of land and buildings are available from the Honolulu Department of Finance. Tabulations for 1940, 1950 and 1959 were

published by the Territorial Planning Office, and values for later years have appeared in reports of the Hawaii State Department of Planning and Research, Hawaii State Census Tract Committee, Honolulu Redevelopment Agency, and Honolulu Department of Housing and Community Development. Data for 1986 appeared in Report CTC-67, table 10. Statistics for 1987 are cited in the present report, table 11.

This report is the eighth in a series initiated with Report CTC-46, "Statistics by Districts, 1980," on January 23, 1981. Subsequent reports included CTC-47 (1981), September 27, 1981; CTC-50 (1982), December 29, 1982; CTC-52 (1983), August 3, 1983; CTC-61 (1984), September 10, 1984; CTC-65 (1985), December 3, 1985; and CTC-67 (1986), December 29, 1986.

1/ For a detailed discussion of these areas and their history, see Robert D. King, "Districts in the Hawaiian Islands," in John Wesley Coulter, comp., *A Gazetteer of the Territory of Hawaii* (University of Hawaii, 1935), pp. 214-230.

2/ HRS (1985 Replacement), Chapter 4.
